

## Code School

We offer boot camps for Web Development and Core QA. Our Code School provides hands-on, in-person, collaborative learning after business hours, allowing you to take an alternative path for education.

As Pittsburgh continues to develop into a major national tech hub, the need for qualified tech professionals has increased as the pool of qualified candidates continues to shrink. That's why we decided to offer our own unique solution by providing a code school to train and grow the next generation of qualified Pittsburgh techies.

We'll immerse you into a curriculum including real world projects to help you gain work experience with job placement, whether with Rivers Agile or another Pittsburgh-based company.

Students have the opportunity to choose from two different learning paths. Each boot camp is taught by one of our experienced consultants over a 12-week period, just long enough for us to equip you for an entry level position in that field.

### Core QA

Breaking things is fun and that's how we got our start. We continue to raise expectations of how proper QA can benefit organizations. This bootcamp is broken down into three parts to help you learn the skills needed to create a proactive QA presence - Core QA Fundamentals, Learning Databases with SQL and Browser Automation with Selenium. You'll leave with the knowledge to be a driving force in producing high-quality, ready-for-market software products.

#### Boot Camp Details

Frequency: Two 12-week courses each year

Cost: \$6,000

Level: Beginner

Date and Time: Monday and Wednesday from 6-9 pm

### Web Development

So you want to be a web developer? This class is for you. We'll cover the basics of commonly-used, current web development languages such as JavaScript, Ruby on Rails, CSS, HTML, SQL and more. This course can be intense at times, requiring you to think abstractly and write a lot of code. You'll leave with the ability to express your creativity through code and the understanding that with the right technical skills, pretty much anything is possible!

#### Boot Camp Details

Frequency: Two 12-week courses each year

Cost: \$6,000

Level: Beginner

Date and Time: Tuesday and Thursday from 6-9 pm
